Chapter 1

Première tentative

Bonjour

```r
library(tidyverse)
d <- rnorm(100, 0, 2)
d %>%
  as.tibble(d) %>%
  ggplot(aes(x = d)) +
  geom_histogram(color="white", fill="grey40")
```

```
## Warning in as.data.frame.numeric(value, stringsAsFactors = FALSE, ...):
## 'row.names' is not a character vector of length 100 -- omitting it. Will be
## an error!
```

```
## `stat_bin()` using `bins = 30`. Pick better value with `binwidth`.
```
